

**LIS-203 INFORMATION TECHNOLOGY (THEORY)
(4 credits)**

Objective:

- To familiarize with basic concepts and components of Information technology, software tools and database management systems useful for information management.

Method of Instruction: A combination of lectures, group discussions, guest lectures (where possible) and special presentations will form methods of instruction. The module will follow with an *examination* at the end of the semester carrying 80 marks covering all units having three types of questions (long, short and very short) to be solved within 2 1/2hrs. Besides, *internal assessment* of 20 marks will be assessed on attendance, performance in presentations, assignments and symposiums.

UNIT I: Information Technology

- 1.1 Information Technology: Foundation & components.
- 1.2 Computer: Genesis, Components & Functions.
- 1.3 Computer: Development & Generations.
- 1.4 Peripheral Devices:
 - 1.4.1 Memory: Primary and Secondary.
 - 1.4.2 Storage Devices, Communication Devices, Multimedia Devices.

UNIT II: Operating System

- 2.1 Operating System: Genesis, Development and Functions.
 - 2.1.1 MS DOS: Introduction, Structure and Commands.
 - 2.1.2 Windows: Features.
 - 2.1.3 Linux: Features and brief commands.
 - 2.1.4 Windows NT: Components and Features.
- 2.2 SERVER: Functions & Client Server Architecture

UNIT III: Programming Languages

- 3.1 Programming: Fundamentals.
- 3.2 Algorithm and Flowcharts.
- 3.3 Programming Languages: Tools.
- 3.4 Generations of Programming Languages: An Overview

UNIT IV: MS-office and DBMS

- 4.1 MS-Word, MS-Excel, MS-PowerPoint
- 4.2 DBMS and RDBMS: concepts, structure, applications.
- 4.3 MS Access: Features, design and query formulation
- 4.4 Bibliographical Database: ISIS family (CDS/ISIS and WINISIS.)
